# OPEN Roberta®

1. If you have a line of numbers that starts with **10.38** you are ok to proceed. Otherwise see the teacher.

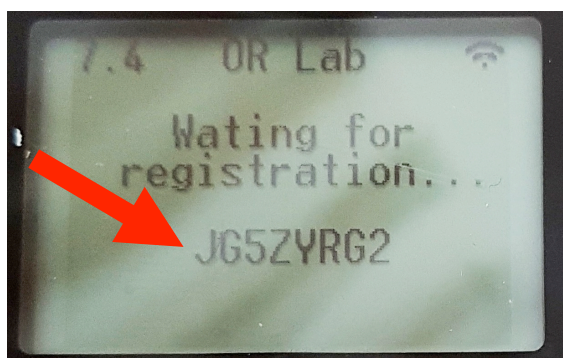

2. Select the middle icon

3. Select **10.38.0.20:1999**

4. You will now get a "Waiting for registration" screen with a code displayed.

5. You will use this code to connect to your robot.
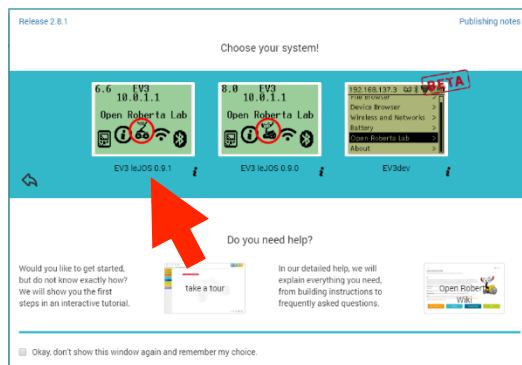

6. Open Chrome to

or.cs.isl.ch

Do not just search Google for Open Roberta, as you will end up at https://lab.open-roberta.org/ which is the WRONG place!
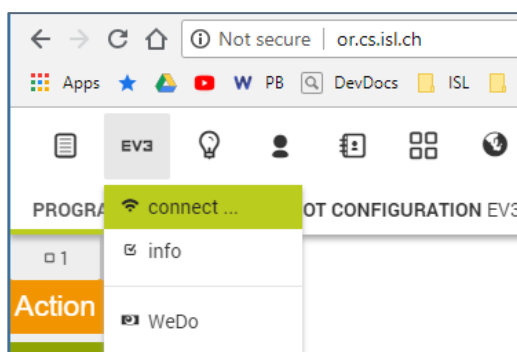

7. Select the EV3 system
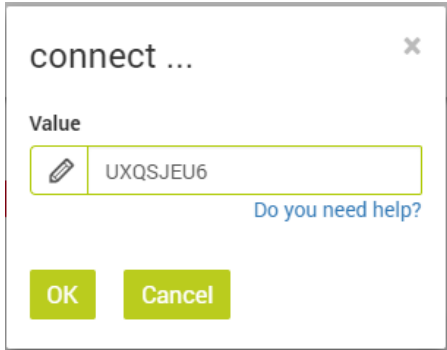

8. Select leJOS 0.9.1
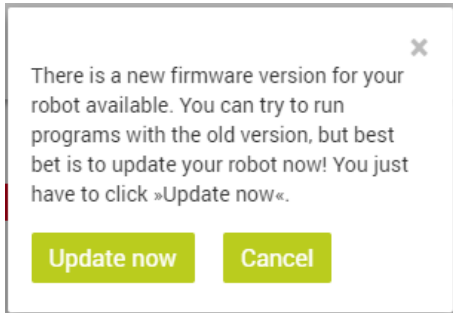

9. In the EV3 menu, select **connect.**

10. Enter your token code and click OK

connect ...   ✕

Do you need help?

OK   Cancel

11. Click CANCEL

✕

There is a new firmware version for your
robot available. You can try to run
programs with the old version, but best
bet is to update your robot now! You just
have to click »Update now«.

Update now   Cancel

12. This icon means you are connected and ready to go. The robot will usually disconnect after ~5 minutes of not being used. If the icon disappears, it means you need to reconnect using these steps again.

Bonus pro tip!
Save your programs on your laptop for re-use. Use export
to download the file, and the import to load it again.
(double clicking the file on your computer won't work to
open it)

⬆ export program

⬆ import program
